Date: JAN-23-2006

2.40

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

(5) Adequate pre-procedural and post-procedural care in accordance with established veterinary medical and nursing procedures.

*** The current PVC has bullet as a method of euthanasia. Gun shot is not an approved method of euthanasia. The veterinarian must revised and update the program of veterinary care to comply with the AVMA 200 guidelines for euthanasia.
Correct by: 2/22

3.129

FEEDING.

(b) Food, and food receptacles, if used, shall be sufficient in quantity and located so as to be accessible to all animals in the enclosure and shall be placed so as to minimize contamination. Food receptacles shall be kept clean and sanitary at all times. If self-feeders are used, adequate measures shall be taken to prevent molding, contamination, and deterioration or caking of food.

*** The feed is currently provided on the ground and is subject to contamination. There is a place that serves as feed receptacle, but currently is not accessible due to the pile of old hay and dirt that is blocking the area. Need to clear the access to the area that is used to contain the feed without contamination.
Correct by: 1/31
